We have just wrapped up our fantastic inquiry, "Let There Be Light." To celebrate, our class shared their learning with Dosbarth Dyfrig by transforming our classroom into an art museum. The students showcased their knowledge by creating beautiful displays of various festivals of light they have studied over the past few weeks. It was a wonderful opportunity for them to demonstrate their understanding and creativity, and the Year 5 students were thoroughly impressed! We are incredibly proud of their hard work and enthusiasm throughout this project.

November has been a busy month for our class, with lots of hard work and progress! In Maths, we have been mastering subtraction and are now tackling more complex problems that require renaming. As the children conquer these challenges, they're also developing their problem-solving skills and exploring bar models. It's been great to see their determination shine through in these tricky lessons.

In our literacy lessons, the children have been wonderfully creative! They wrote imaginative list poems inspired by the book *Jim and the Beanstalk*. They also built electrical circuits adding light effects to their delightful puppet shows based on *The King Who Banned the Dark*, bringing the story to life with their expressive performances. Our latest book, *The Marvellous Moon Map*, has also captured their interest, and they have loved exploring its enchanting story. It's been a joy to see their enthusiasm and creativity flourish!

We Learn, We Play, We Care, We Pray.
