The summer term has been full of creativity, sunshine and special moments together in Dosbarth Dwynwen. We have loved making the most of our final weeks of learning and spending time with our wider community.

A real highlight was our Village Tea Party, where we welcomed members of the community, church and our families. We enjoyed sharing stories, singing songs and spending time together. It was a wonderful opportunity to celebrate the special connections between our school and the community around us.

In our Inquiry, we became toy designers and makers! We researched toys from around the world, with a particular focus on traditional wooden toys, before designing our own wooden robot toys using wood and recycled materials. InWe even used AI to bring our designs to life before working with a partner to reflect on and improve our ideas. Then came the exciting part — using saws, drills and loose parts to turn our designs into real toys!

We also enjoyed a trip to St Fagans, where we explored toys from the past and learned more about the toys children played with in Wales many years ago. It was fascinating to compare them with the toys we enjoy today and gave us lots of inspiration for our own toy-making inquiry.

We have also been making the most of the beautiful hot weather! We took our creativity outdoors with lots of drawing and enjoyed exploring the water tray and sand area. It has been lovely to learn, play and create together in the sunshine as we come towards the end of a wonderful school year.
